

Why Silicones?

- Stable, Clean, Durable, Adaptable and Versatile
- Outstanding weathering and aging resistance
- Thermostability
- High water repellency
- Extremely strong adhesion qualities
- Can withstand long-term exposure to the atmosphere
- Ultraviolet resistance
- Extremely low volatility
- Inertness – non reactive with most materials
- Chemical resistance
- Long-term elasticity, pliability and flexibility
- Excellent electrical insulation
- Tensile strength
- Anti-foaming properties
- Microbial resistance
